LEE PUNCTURE-PROOF TIRES

RUBBER STEEL COTTON WELDED TOGETHER

TO MAKE THE PUNCTURE-PROOF TIRE SUPREME

The only tire in the world that uses an air tube—retaining all the ease of riding on any pneumatic tire—and yet is puncture-proof.

Imitation is the sincerest flattery. Scores of others have recognized the essential importance of manufacturing a tire with such a puncture-proof feature as ours—but our patents are well protected, and we stand alone as the sole manufacturer of a pneumatic puncture-proof tire.

A tire that does not sell itself in the hands of its users makes few friends. The success of any product depends in the last analysis on the ability of that product to make friends because of its real merit. This is the headline that determines whether it will thrive or perish.

Our sales daily increase because the Lee Puncture-Proof Tire makes and keeps friends by its phenomenal-mileage and satisfactory service rendered.

No delays on account of punctures. No blow-outs. No extra investment in tubes and casings. No large, unnecessary bills to come in from tube and casing repairs.

Why shouldn't you be one of the progressive thousands who are eliminating tire trouble and worry by riding on LEES? We ask frankly, WHY?

We cater to every class of motorist—the family pleasure car, the merchants' delivery car—big trucks—to help them get the full benefit of their motor.
